SAFETY TESTING
Safety Test
COMPLETED

Overwhelming amount of **245.7 billion** exosome particles will provide changes that you won't have experienced until now.

* Skin irritation testing completed Oracle Clinical Skin Test Center Co., Ltd. / 2022.7.18 ~2022.7.20 / 34 adult males and females

Visible composite skin change due to aging and stress

Micro-aging and skin sensitization

- Lifeless and sagging skin pores
- Weakened skin
- Perpetual dryness
- Pigmentation
- Skin trouble due to stress
- Dull skin
- Crumbly and rough skin texture

Varicolored
facial flushing

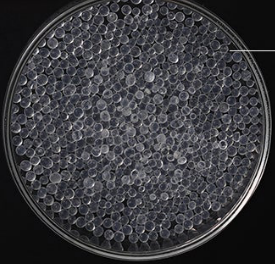
ExoHealer™

Umbilical cord blood stem cell conditioned media containing 1,470 types of cell activation substances
USC1994-CM™

6 types of skin function strengthening and growth factors
USC1994-SPC™



Solution found in the umbilical cord blood stem cell conditioned media **exosome**

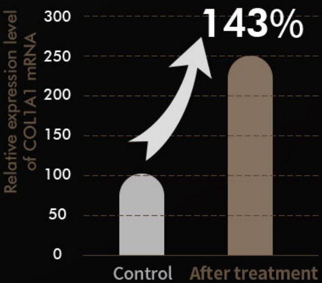
USC1994® Increase in synthesis of **collagens I & III**, which are compositional skin substances, when a product containing 5% of USC1994® stem cell culture solution exosome is used.

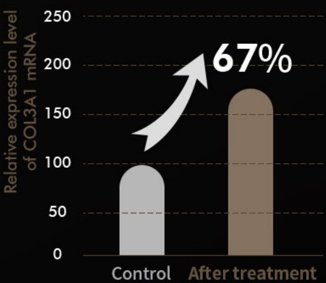
Approximately 143% increase

in collagen I synthesis

Approximately 67% increase

collagen III synthesis

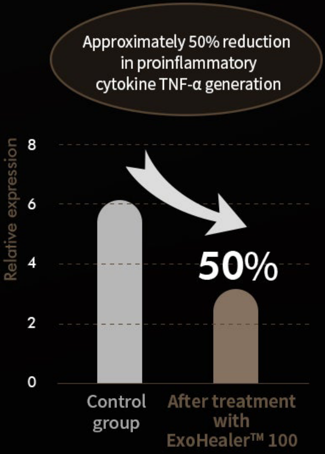




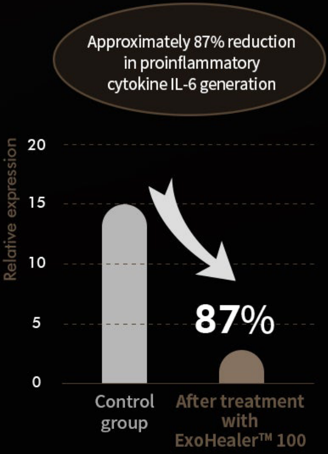
group with ExoHealer™ 5%

group with ExoHealer™ 5%

Proven efficacy in the suppression of inflammation through confirmation of the quality and quantity of proinflammatory cytokine **TNF-α and IL-6** generation



Approximately 50% reduction in proinflammatory cytokine TNF-α generation



Approximately 87% reduction in proinflammatory cytokine IL-6 generation

[Source of data] 1) Test of the efficacy of human umbilical cord blood stem cell conditioned media (USC-CM in enhancing the ability to increase generation of human dermal fibroblast collagen KISCS-AF J005IV-KST(2) (Korea Institute of Dermatological Sciences * Additional explanations: USC-CM™ = USC1994® former name 2) Effects of conditioned media from human umbilical cord blood-derived mesenchymal stem cells in the skin immune response / Biomedicine & Pharmacotherapy / 2020 * Limited to characteristics of the raw ingredients.

Foundation of global competitiveness
Source stem cell technology

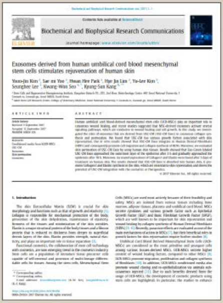
Only enterprise in South Korea to secure stem cell separation methodology and mass culture technology Completed scientific investigation with publication of more than 290 SCI class journals

Biochemistry and Biophysics Reports

Conditioned media from human umbilical cord blood-derived mesenchymal stem cells stimulate rejuvenation function in human skin

<Publication of SCI level thesis: Biochemistry and Biophysics Reports>

<Completed patent registration for the preparation and associated technologies>



Biochemical and Biophysical Research Communications

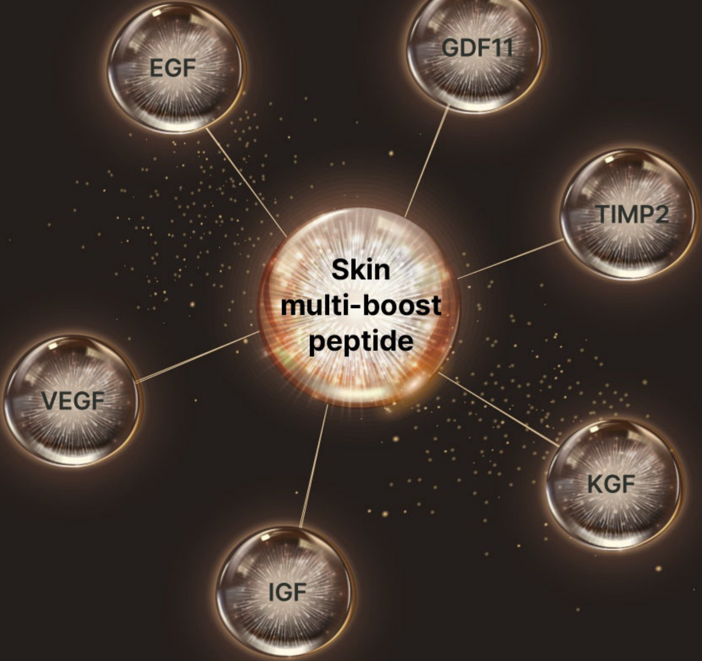
Exosomes derived from human umbilical cord blood mesenchymal stem cells stimulates rejuvenation of human skin

<Publication of SCI level thesis: Biochemistry and Biophysics Reports>

* The above content is limited to the characteristics of raw ingredients

Point 02

Strengthened exosome function with 6 types of skin growth factors



Skin Multi-Boost Peptide (USC1995-SPC™)
achieves the synergic effects of
FILCORE SB PLUS with 6 types
of growth factor peptide ingredients

* The above content is limited to the characteristics of raw ingredients

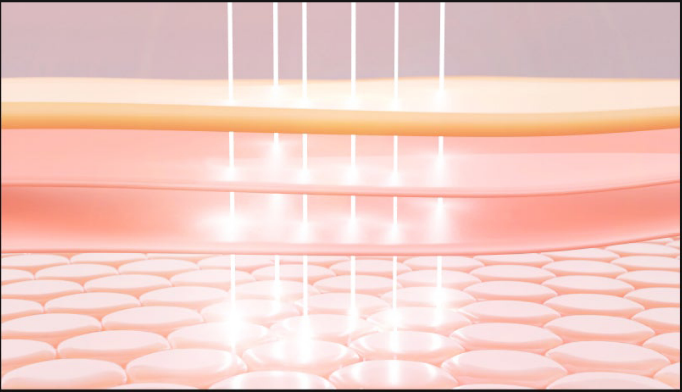
Point 03

The core issue is how to deliver which

active ingredients deep into the skin!

Powerful skin absorption of 245.7 billion exosome particles!

#FILCORE #ExoHealer™



ExoHealer™

ExoHealer™ is the name of the exosome included in USC1994-CM™, an umbilical cord blood stem cell, which maximizes the absorption rate and affinity of active ingredients.

*The above content is limited to the characteristics of raw ingredients

Point 04

Optimal synergy for activation of **245.7 billion** exosomes

#FILCORE
ACTIVATING SOLUTION

Exosome synergy solution

- 22 types of amino acids
- 13 types of vitamins
- 7 types of peptides
- 4 types of antioxidation
- 4 types of minerals
- SOD antioxidation enzyme
- 8 types of hyaluronic acids

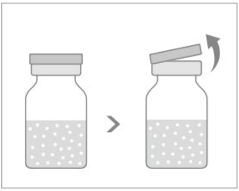
HOW TO USE

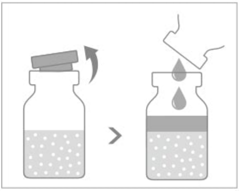
P198 FILCORE SB PLUS



01

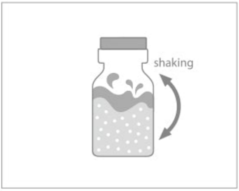
After pulling the transparent cap at the top of the container to the end in the direction of the arrow by exerting force, remove all aluminum around its circumference.

*Prior to opening, make sure to shake the
P198 Filcore Activating Solution before use.



02

Remove the rubber cap and add 5ml of
P198 Filcore Activating Solution to
P198 Filcore SB Plus Powder.



03

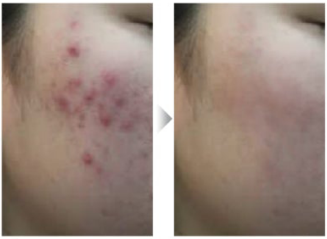
After dissolving sufficiently by lightly shaking the mixture 3~4 times, spread on the desired skin area and allow it to be absorbed.

* It is recommended that the product be used immediately

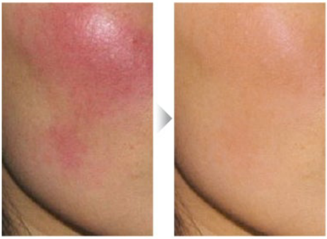
after opening since it contains no preservatives.

Clinically proven efficacies and effectiveness

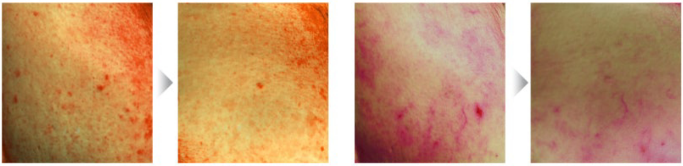
Acne skin improvement



Improvement of facial blushing in women during the menopausal stage



Improvement of skin roughness, distension of blood vessels, and distribution of melanin pigment



* Verification study of effectiveness of freeze-dried powder containing USC1994-CM™
* Follow-up observation up to the 12th week after 3 procedures conducted at 2-week intervals
* Clinical trial at Kangbuk Samsung Hospital Dermatology Department

FILCORE SB PLUS PROGARM

Q & A

Q What differences are there between this product and other exosome skin boosters?

A P198 is a product that uses only high-concentration raw ingredients of pure 100% stem cell culture solution. Accordingly, it provides assistance in maximizing the skin absorption rate and affinity of 1,470 types of growth factors and cell activation substances, since it contains exosome particles. As a result, the active ingredients effectively assist with skin care concerns.

Q What is the reason for freeze-drying stem cell exosome?

A The product is manufactured in rapid freeze-drying format to maximize the efficacies and effectiveness of the stem cell exosome active ingredients. As a result, it is possible to experience maximal efficacy of the P198 ExoHealer project by thawing immediately prior to product use, minimizing changes due to heat during product processing, and maintaining outstanding product preservation during distribution.

Q Will I experience any skin irritation or allergies from use of this product?

A P198 is a product for which skin safety tests have been completed at clinical dermatology institutions. As such, no concerns are necessary. However, since it is possible for irritation or side effects to occur depending on variations in individual skin conditions, please consult a medical specialist if side effects occur.

Q The appearance of the freeze-dried power has changed. It now looks powdery and lower in quantity.
